Diagnostic Wax-Up Check List

The following are essential tools we will need to design your aesthetic case. These should be obtained during the initial diagnostic appointment and prior to prepping:

1. All 5 requested photos (see Photo Guide).
2. Full arch impressions of both upper and lower arches (must include good gingival capture).
3. Bite registration (include CR/CO bites).
4. Stick-bite (horizontal plane, parallel to horizon line between pupils).
5. Detailed lab prescription, thoroughly filled out, including:
 - a. A clear expression of the patient's goals
 - b. Desired final length of the centrals
 - c. New vertical measurements from CEJ to CEJ
